

Project Boom Budget

This document contains the estimated costs to provide our target of 100 students with computers in the remainder of 2020 and 440-500 students in 2021. This budget was last revised and updated on Friday, September 4, 2020. The budget is updated at the end of every quarter with the remaining funds from the quarter.

We anticipate our main source of income to be primarily corporate and foundation funding along with private individuals also providing some contributions. Another source will be the \$0 to \$50 price for people to purchase computers. This price is set by what they are able to pay, opposed to the device they are receiving. However, these funds will only be available during the following quarter.

Our main expense is repairing the computers and the cost of shipping. Our fiscal sponsor has a fee of 7%, therefore, requiring us to raise 7% to our expenses. This is what creates the disparity between funds needed and funds to raise.

All inquiries about this budget can be directed to Kunal Botla through kunal@projectboom.org.
